LOCK & SAFETY SYSTEMS

BEHIND THE SCENES

Standard Lock

High level of security - Two very stable hook bolts (pivot activated) - One located at the top, one at the bottom and also one main bolt.

Optional Safety Lock

Optional maximum security - Four very stable hook bolts (pivot activated) - Two located at the top, two at the bottom and also one main bolt.

Optional Safety Latch

Standard Silent Trap

The "silent trap" is a maintenance-free bolt with a synthetic noise-absorbing pad inserted to keep the noise to a minimum when shutting your door.

SAFE.
AIR-TIGHT.
ELEGANT.

Optional Mechanical Auto Lock

WITHOUT AUTOMATIC OPENER:
Opens with a key.

WITH AUTOMATIC OPENER:
Opens through an electro-mechanical lock with a pivot mechanism.

Optional Motorised Electric-Mechanical Auto Lock

Doors with this particular feature can be opened, locked and unlocked automatically by a remote control.

Optional Access Systems

The modern access systems integrated with your car keys (transponder with bluetooth), your cell phone or a fingerprint sensor can be installed on request.

Standard 3D Door Hinge

Outstanding stability combined with flexible 3D adjustment possibilities. This means that the hinges can be adjusted precisely on three dimensions - side to side (X), up and down (Y) and pressure (Z).
